

SMARTBRIDGE

Let's Bridge the Gap

Date: July 8, 2026

Team ID: XXXXXX

Project Name: Personalized Networking Assistant

Maximum Marks: 4 Marks

1. FUNCTIONAL REQUIREMENTS (FR)

S.No 1: System Access

Open access model allowing users to use the app without creating an account, tailored for academic evaluation.

Priority: Low

S.No 2: Permissions & Roles

Single-tier access model. The current deployment does not require multi-level user roles or access controls.

Priority: Low

S.No 3: Third-Party Integrations

Links with Hugging Face Transformer models (GPT-2 and DistilBERT) and the Wikipedia API for validation.

Priority: High

S.No 4: Core Processing

Accepts attendee role, event title, and interests to generate custom icebreakers, verify claims, and store history and ratings.

Priority: High

S.No 5: Data Presentation

Interactive dashboard for viewing history, outputs, and feedback.

Priority: Medium

S.No 6: Operational Logic

Suggestions align with event context, role, and interests using verified information.

Priority: High

S.No 7: Regulatory Compliance

Stores data locally and avoids collecting personally identifiable information.

Priority: Medium

S.No 8: Miscellaneous

Modular architecture for future enhancements and maintainability.

Priority: Medium

2. NON-FUNCTIONAL REQUIREMENTS (NFR)

S.No 1: Speed & Performance

The application must respond smoothly.

Target: AI-generated output within 5–10 seconds.

S.No 2: System Scalability

Support future AI models and multi-user capabilities.

Target: Modular codebase.

S.No 3: Privacy & Information Security

Protect local data and validate inputs.

Target: Secure APIs and local JSON storage.

S.No 4: System Resilience

Handle failures gracefully.

Target: 99% success for valid requests.

S.No 5: User Experience

Simple, intuitive interface.

Target: Complete workflow in three actions or fewer.

S.No 6: Architecture Constraints

Independent service modules.

Target: Clean, maintainable architecture.
