

Project Roadmap

Personalized Networking Assistant

Date: 12 July 2026

Development Timeline

Phase	Objective	Key Deliverables
Sprint 1	Build the Foundation	UI, Backend API, Topic Detection
Sprint 2	Develop Smart Features	Conversation Generation, Fact Verification, History
Sprint 3	Finalize & Release	Feedback, Data Logging, Testing, Deployment

Milestone Highlights

- ✓ Sprint 1: Functional user interface and API integration completed.
- ✓ Sprint 2: AI-powered conversation generation and fact verification implemented.
- ✓ Sprint 3: User feedback, testing, documentation, and deployment completed.

Estimated Project Outcome

A web-based assistant that generates personalized networking conversation starters, verifies facts using trusted sources, and stores user interactions for future reference.
